

# NGUYEN DUY CUONG

**FULLSTACK WEB DEVELOPER (MERN)**

0357747764
Hanoi, Vietnam
nguyenduycuongndc2004@gmail.com

Final-year IT student at PTIT building real-time MERN applications. Designed and shipped a **Trello Clone** platform end to end — **41 REST endpoints**, Socket.IO real-time sync, JWT Refresh Token Rotation, Dual-Auth security, and **43 automated tests** on GitHub Actions CI. Seeking a **Fullstack Intern / Fresher** role.

- Live Demo (Trello Clone): https://trello-web-tawny.vercel.app (login page → "Try as Guest", first load may take ~30s on Render free tier)
- Portfolio: https://duycuongdev.github.io/portfolio/
- GitHub: https://github.com/duycuongdev

## SKILLS

- **Technical skills (used in my shipped project):** ReactJS, JavaScript (ES6+), NodeJS, ExpressJS, MongoDB (Native Driver & Aggregation), Redux Toolkit, Material UI (MUI v5), Socket.IO, @dnd-kit.
- **Technical additional & DevOps:** JWT (Refresh Token Rotation), Google OAuth 2.0, Joi Validation, Cloudinary, Brevo Email API, Swagger / OpenAPI, Node Test Runner (unit & integration), Git / GitHub, GitHub Actions CI, Vercel, Render.
- **Familiar (coursework & self-study, not yet used in a shipped project):** TypeScript, Tailwind CSS.
- **Languages:** Vietnamese (Native), English (TOEIC 620).

## EDUCATION

**Posts and Telecommunications Institute of Technology (PTIT)** (Aug 2022 - June 2027 | 5 years)

- Final-year student, majoring in Information Technology.
- Relevant Coursework: Data Structures & Algorithms, Database Design, System Architecture, Software Engineering, Web Security.

## PROJECTS

**Trello Clone — Real-Time Kanban Task Management Platform**
Fullstack Web Developer (Solo Project)

| | | |
|---|---|---|
| **Project Links**<br>Live Demo: https://trello-web-tawny.vercel.app<br>Frontend Repo: https://github.com/duycuongdev/trello-web<br>Backend Repo: https://github.com/duycuongdev/trello-api<br>Try as Guest: one-click demo login on the app's login page (no sign-up required) | **Team Size** | 1 (Solo Full-Stack Project) |
| | **Position** | Fullstack Web Developer |
| | **Project Summary** | A decoupled full-stack Kanban task and project management platform inspired by Trello (a learning-focused clone, not affiliated with Atlassian), built on the MERN stack with Socket.IO for instant real-time team collaboration. |
| | **Responsibilities** | - Designed **41 REST API endpoints** ( `/v1` ) and deployed the decoupled React/Vite SPA on **Vercel** and the Node.js/Express REST + WebSocket API on **Render**.<br>- Built smooth multi-column & card drag-and-drop workflows using **@dnd-kit** (custom collision detection, optimistic updates), managed via **Redux Toolkit**, **Redux Persist**, and Axios token-refresh interceptors that queue concurrent 401s behind a single refresh call.<br>- Implemented room-based **Socket.IO** synchronization ( `board:<id>` ) for live user presence, instant card updates, comments, and board invitations across all connected clients.<br>- Engineered resilient **Dual-Auth** (HttpOnly Cookies + Bearer Header fallback for browsers that block cookies) with **JWT Refresh Token Rotation** (single-use tokens, reuse revokes the session), **Google OAuth 2.0**, **Brevo** email activation, and per-IP rate limiting.<br>- Designed **MongoDB** data layers with multi-document **transactions** and Aggregation Pipelines for unified invitations and `DUE SOON` / `OVERDUE` deadline alerts, plus **Cloudinary** media/cover uploads.<br>- Enforced **Joi** payload validation, documented all endpoints with **Swagger/OpenAPI** ( `/v1/docs` ), and wrote **43 unit & integration tests** ( `node --test` — including IDOR and token-rotation suites) running on **GitHub Actions CI**. |
| | **Technologies** | - **Frontend:** React 18, Vite, Material UI (MUI v5), Redux Toolkit, Redux Persist, @dnd-kit, Axios, Socket.IO Client.<br>- **Backend & Cloud:** Node.js, Express.js, MongoDB (Native Driver), Socket.IO, Joi, JWT, Google OAuth 2.0, Cloudinary, Brevo, Swagger, GitHub Actions. |

**THANK YOU SO MUCH FOR TAKING THE TIME TO REVIEW MY CV, HAVE A GOOD DAY!**
